

UPSTAGE DOCUMENT AGENT

The agent reads the brief. You apply.

Drop any announcement. The agent reads it, checks your profile, and answers: can you apply?

JunctionX Korea 2026

Upstage Track

Team Aquarium

PROBLEM

Can I apply?

Students miss opportunities not from lack of listings — from the cost of reading unstructured docs.

70%

Attachments

Opening HWP, PDF, and posters to scan long briefs.

65%

Hidden rules

Finding buried clauses like age, year, and major.

55%

Fit

Picking notices that actually match your profile.

Reading is the bottleneck.

Aggregators stop at links. The friction starts after you click.

Boards

23m

Raw attachments only

You read the HWP yourself

Generic tags, no profile

Eligible / Review / No + reasons

Solar fit score 0–100

Three moves. Done.

A file becomes a verdict, a score, and a checklist.

Four steps.

Zero to an application decision in about two minutes.

01

Profile

Certificate, GitHub, or a short note — merged in one minute.

02

Collect

Upload, paste a URL, or crawl Wevity and ContestKorea.

03

Feed

Every card already has a verdict badge and a Solar score.

04

Apply

Reasons, review checklist, then Document Chat.

Notice feed

Notices analyzed by the Upstage agent, with eligibility judged against your profile.

Yes. Page 3 of the brief lists **enrolled students, students on leave, and expected graduates**. Every teammate must meet the same rule.

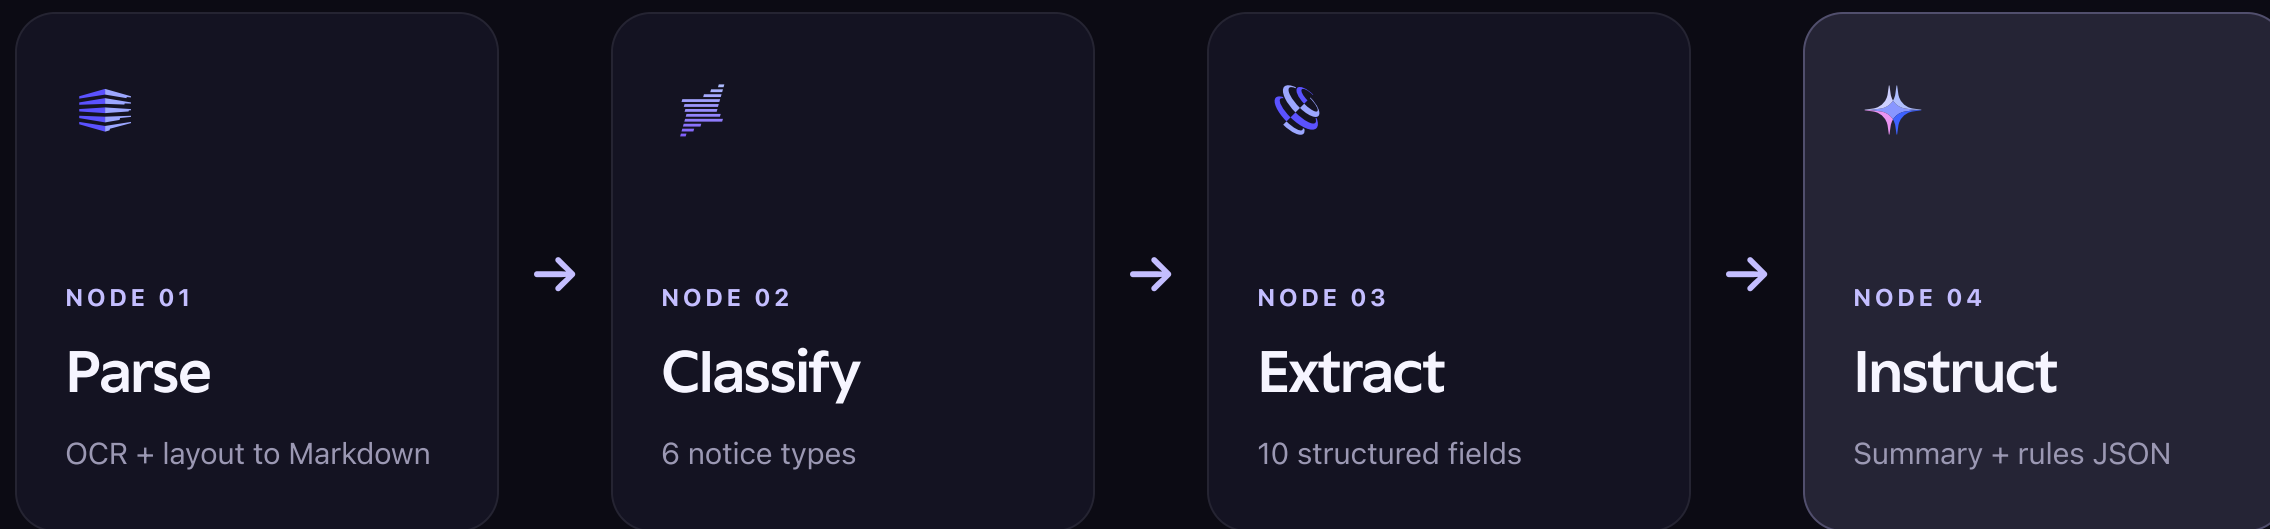

Attach a notice and ask a question...

 Attach document

One agent. Zero bypass.

Upload, link, and crawler all hit the same Studio agent.

All four. In production.

Not a combo slide — every product runs inside the live service.

Studio Agents

Core 4-node notice pipeline.

Document Parse

OCR and layout for HWP & posters.

Information Extract

Certificates and chat schema extract.

Solar Pro 4

Fit scores, profile extract, tools.

Built to last the demo.

Real Korean-document edge cases, with the reasoning visible.

Resume

Refresh-safe sessions

Workflows survive reload. No duplicate bills.

Stream

Live NDJSON + reasoning

Stages, artifacts, and Solar thought process.

Match

6 rules, with reasons

Grade, status, age, major, region, team.

SCOPE

Ship the loop. Cut the rest.

A complete end-to-end path in three days — and a clear next cut.

SHIPPED

3 ingest paths

4-node agent

Eligibility + chat

OUT

Multi-user auth
